SUMMARY

Full Stack Developer who builds and ships production-ready applications end-to-end. Created Pixora, a live Canva-alternative with a drag-and-drop design editor and Gemini AI integration, deployed on Vercel. Delivered 10+ production web and mobile apps using React, Next.js, Node.js, MongoDB, and React Native. Pursuing BCA (Data Science) at 8.7 CGPA with a specialisation directly applicable to AI-integrated full-stack development.

TECHNICAL SKILLS

Languages: Java, JavaScript, TypeScript, HTML, CSS

Frontend: React.js, Next.js, Tailwind CSS

Mobile: React Native

Backend & Databases: Node.js, Express.js, REST APIs, MongoDB, MySQL

Tools: Git, GitHub, VS Code, Vercel, Render

Concepts: Authentication (JWT), CRUD Operations, API Integration, Responsive Web Design, Zustand State Management

PROJECTS

Pixora – Canva-like Web Application | <https://pixora-blush.vercel.app/>

- Shipped a live Canva-alternative (pixora-blush.vercel.app) with a full drag-and-drop design editor, reusable component library, and responsive layouts — deployed on Vercel.
- Integrated Gemini AI API into a contextual in-app chatbot, reducing user friction during the design workflow — AI in production, not just a demo.
- Engineered a drag-and-drop design editor with reusable component library and fully responsive layouts across all breakpoints.
- Built secure REST APIs with JWT authentication covering user management and design persistence; zero reported auth vulnerabilities post-launch.
- Managed complex client-side state across multi-step design workflows using Zustand, eliminating prop-drilling and cutting re-render overhead vs. Context-only approach.

Inventory Management Mobile App

- Built a cross-platform inventory management app (iOS & Android) using React Native, managing a catalogue of 50+ SKUs with full CRUD, barcode scanning, and real-time sales tracking.
- Reduced product entry time by ~70% via barcode-scan-to-entry in under 2 taps, replacing a manual form-input workflow.
- Engineered a real-time bill generation feature — users select products, quantities auto-calculate totals, and the finalised bill is saved directly to the device gallery as a shareable image.
- Implemented one-tap bill sharing via native share sheet, enabling merchants to send invoices to customers instantly through WhatsApp, email, or any installed app.
- Secured the app with JWT authentication and session management across both mobile platforms.

Additional Applications

- Shipped 10+ web and mobile applications covering API-driven dashboards, auth-protected portals, and responsive UIs — all deployed on Vercel or Render, not localhost demos.

EDUCATION

Bachelor of Computer Applications (Data Science) – Acharya Institute of Technology | 2023 – 2026 | CGPA: 8.7

Class XII – St. Claret PU College | 2021 – 2023 | 84%

Class X – Standard Public School | 2011 – 2021 | 83%
